PROJECTS

Sentiments Analysis using Natural Language Processing

Sep 2022 - Dec 2022

I developed a sentiment analysis engine by obtaining meaningful information and semantics from a text, by using natural processing technique and determined the persons attitude, whether positive, negative, or neutral.

Attendance Management System

Nov 2022 - Dec 2022

Attendance Management System is a Java Swing and php project that is used to track students' attendance. This project has an admin side as well as a user side where users may see attendance. The Admin user is responsible for all administrative duties

Library Management System

Oct 2022 - Nov 2022

I created a Library Management System that is a great way to monitor books, add them, update information in it, search for the suitable one, issue it, and return it when needed . In this project I used mysql for database and java swing for frontend.
